

Coal Sampler Technical Analysis

Focusing on the application of coal quality technology for improved efficiency in sampling

Sample Plant Inspection, Auditing, Precision and Bias Testing

**“Great decisions depend on great data ... so
make sure *your* decisions are based
on the very *best* data possible!”**

**Ask us how a sampler bias of less
than 1% could cost millions**

Coal Sampler Technical Analysis

Periodic inspection and auditing of sampling systems ensures

- ★ Identification of sampling system adjustments offering a financial return
- ★ Identification of issues causing inaccurate data for decision making
- ★ Dispatch of cargo that is in specification
- ★ Maximising of yield in processing
- ★ Accurate carbon accounting
- ★ No unnecessary premiums for inaccurate moisture calculations
