

# Field Sampling Services

ALS' Middletown location works hand-in-hand with the client to satisfy their project requirements, which include sample transportation and on-site sample collection. ALS' Field Services Group consists of trained field technicians and couriers who routinely perform sample pickup, transportation, and sample collection services for its customers.

## Sample Collection

ALS can provide you with an experienced staff to perform your sampling requirements. Before a project-specific sampling program begins, the Senior Field Services Technician and field sampling team will gain thorough knowledge of sample collection procedures, project management, and proper sample preservation/shipment. Sampling methods are followed as described in written Standard Operating Procedures (SOPs), which contain sampling methods developed by regulatory requirements and field experience. Using these SOPs as a guideline, our sampling personnel ensures the client that collected samples are representative of the original system or source, fully labeled and identified, and properly preserved and transported to the laboratory.

## Sample Equipment

ALS owns and maintains a full list of field sampling equipment, which includes, but is not limited to, submersible sampling pumps, peristaltic pumps, Well Wizard™, landfill gas analyzer, composite/discrete samplers, pH meters, SCT meters, CO2/H2S/combustible gas meters, dissolved oxygen meters, and sonic interface probes.

## Safety

ALS' Field Technicians are required to fulfill the 40-hour OSHA certification for Health and Safety at Hazardous Waste Sites before sampling on-site and maintain the annual 8-hour refresher course. When sampling, our field technicians are required to sample according to OSHA guidelines and project-specific Quality Assurance Project Plans (QAPPs) or Statement of Work (SOW) provided by the client.

## Experience

Our field sampling team is currently responsible for various sample collection programs, which may include one-time sampling events or daily, weekly, monthly, and annual events in support of industrial wastewater monitoring programs, SDWA drinking water programs, environmental landfill monitoring programs, and low-flow well events.

## Convenient Service Centers

We have convenient service centers located throughout the Northeast to assist in handling our clients' needs. These include locations in: Columbia, MD; Spring City, PA; Washington, PA; York, PA.

## SERVICE

- On-time data delivery and rapid TAT
- Experienced staff with expertise
- Available after-hours and weekends

## VALUE

- Instant access to data with Webtrieve™ and Webtrieve™ Mobile App
- Custom bottle kits with pre-printed labels and COCs

## RELIABILITY

- Technical experts that can answer your most difficult questions
- A real focus on quality and process control with a rigorous QA/QC program
