

Industrial Hygiene Services

ALS provides a comprehensive list of industrial hygiene analytical services with state-of-the-art laboratories throughout North America. Accredited by the American Industrial Hygiene Association (AIHA-LAP, LLC), ALS offers NIOSH and OSHA analytical methods, giving you confidence in the numbers you use to make decisions affecting the health of your employees and your clients.

We want to offer you more than analytical data. We want to get to know your business and become a partner in helping you meet your Occupational Health and Safety needs. Our experienced staff can assist in evaluating your sampling and analysis requirements. We will ensure that you are doing the correct analysis for your situation and provide you with the advice necessary to do the job right the first time. In addition to offering expertise and advice, ALS also maintains an extensive stock of sampling media and can make recommendations for proper sampling techniques and sample handling.

ALS clients have access to non-routine analytical techniques that are not available through a standalone IH laboratory.

This includes access to ALS's global team of professionals in the areas of analytical chemistry, industrial hygiene, human health, and environmental analysis. ALS wants to help you meet your Occupational Health and Safety needs by providing you with a fast, reliable, personalized service and professional expertise.
