

Saskatoon Laboratory

Proudly serving Saskatchewan clients since 1966 with premier service, global quality standards and industry leading analytical analysis.

ALS is a leading testing, inspection, certification and verification company servicing multiple industries globally. As one of the world's largest and most diversified testing services providers, ALS employs over 13,000 staff in over 65 countries with sites strategically located to provide accurate and timely services.

ALS offers a full suite of analysis for oil & gas, mining & industrial, remediation, reclamation, water and wastewater analytical services. This includes organic, inorganic, physical properties and microbiology. Our analytical services are utilized by government entities, private business owners, environmental managers, consultants, engineers, operators and individual concerned citizens. Analysis for emerging concerns such as organic pollutants and pharmaceutical products are as well supported by ALS Saskatoon.

ALS proudly serves our Saskatchewan clients and continues to stay focused on our strengths of quality, integrity, and service. As ALS, we are at the forefront of new industry requirements to continually improve and better serve our clients. ALS recognizes you have a choice and are committed to your success. Contact us for project quotes, pricing, free sampling supplies and guide, account set up, data management tools, TATs, logistics, credit app, additional Canadian/global lab network support.

Our Expertise Includes

Organic Soil

- BTEX, TCLP BTEX
- TVH, TEH
- CCME F1-F4 & F4G
- Histograms C11-C22/ C23-C60
- VOC

Water

- OGG & MOG
- BTEX
- TVH, TEH
- F1-F4
- Histograms C11-C22/ C23-C60
- VOC 8260

Inorganic Soil

- Salinity (Detailed & Basic)
- pH, Conductivity
- Particle Size
- Loss on Ignition
- Cation Exchange Capacity
- Carbon (organic and inorganic)
- Nitrogen
- Sulfur
- Metals and Mercury
- Available Nutrients (N, P, K, S)
- Boron
- TCLP Metals and Mercury
- Flashpoint

Water

- Total Coliforms, Thermotolerant Coliforms, E. Coli and E. Coli in Biomass
- Major Ions
- Salinity
- pH, Conductivity
- Hardness, Alkalinity
- Nitrate & Nitrite
- Phosphorus, ortho-P
- Ammonia
- Colour
- BOD and COD
- Metals and Mercury
- Solids (TSS, TDS, VSS)
- Heterotrophic Plate Count
- Turbidity

Service

- On-time data delivery and rapid TAT
- Experienced staff with expertise
- Available after-hours and weekends

Value

- Instant access to data with Webtrieve™ and Webtrieve™ Mobile App
- Custom bottle kits with pre-printed labels and COCs

Reliability

- Technical experts that can answer your most difficult questions
- A real focus on quality and process control with a rigorous QA/QC program
