

## New European Hub-Lab in Loughrea, Ireland

### ALS Minerals is pleased to announce the opening of the new European Hub Lab in Loughrea, Ireland.

ALS Minerals announces the opening of the new European hub lab based in Loughrea, Co. Galway, Ireland.

ALS Loughrea (formerly OMAC) have been providing World Class Analytical Services to our clients for over thirty years. ALS Minerals has invested in a new state-of-the-art facility at this location comprising a 3,000sq m building located right in the core of Loughrea industrial park. The new facility provides sufficient infrastructure to allow installation of additional capital equipment on a “plug & play” basis facilitating an increase in production capacity at any given time.

The new facility is equipped with the latest technologies available in the market to provide our valued customers with a wide range of analytical services such as:

- Sample Preparation
- Fire Assay
- AAS/ICP-OES/ICP-MS
- XRF (Uranium/Iron Ore/Bauxite)
- Geochemistry
- C&S Leco Analyser
- Hg by Cold Vapour (FIMS-400)
- CN Leaching

Our existing team of highly skilled employees now have the benefit of a modern and efficient facility which will guarantee the high quality and enhanced timeliness of data being generated by this highly regarded laboratory.

ALS Loughrea is accredited to ISO17025 by INAB since 2006

“  
**High, Medium and Low Grade plus Ultra-trace packages  
are available through our combinations of  
ICP-OES & ICP-MS ISO17025 accredited packages.**  
”

The laboratory operates an extensive Quality Control/Quality Assurance program fully integrated to our Global LIMS system (GEMS), which covers all stages of the analytical process from sample preparation through to sample decomposition and reporting. Regular participation on internal and international proficiency testing programs organized by Geostats Pty Ltd (Australia), CANMET (Canada), CSIRO (Australia) provide continuous assurance of quality. The laboratory also regularly participate in certification programs and is a laboratory of choice for many companies involved in the production and certification of mineral reference materials for base metals, gold and PGM's.

We welcome and encourage dialogue with our clients so that methods and procedures can be optimized to suit particular needs and as always we are on hand to discuss specific or new innovative applications. Should you have any queries or need more information regarding ALS Loughrea capabilities and capacities please feel free to contact us.

**ALS WELCOMES THE OPPORTUNITY TO PROVIDE COMPREHENSIVE  
TOURS OF THE OPERATION**
