

# New ALS Geochemistry laboratory in Auezov, Kazakhstan open for sample preparation.

## New laboratory in Kazakhstan has:

- Rock and core sample preparation
- Soil sample preparation
- Fire Assay
- AAS
- Geochemistry
- Webtrieve™ state of the art data delivery and process monitoring

•ALS Minerals new laboratory in Auezov, East Kazakhstan (90 Km from Ust-Kamenogorsk) offers sample preparation, fire assay, and AA analysis. Located nearby the historic mining center of Bakyrchik.

•This lab has starting capacity for 400 samples/day, which will double by the spring.

•The Customs Union between Kazakhstan and Russia has made sample shipping easy, fast and inexpensive. In the spring we will begin to offer analyses by ICPMS in Russia.

•With this facility, ALS can now provide a fast, efficient analytical service to Kazak clients.

•Samples will be analyzed on site or to ALS laboratories in Kara Balta, Kyrgyzstan and elsewhere for other geochemical, metallurgical and environmental analysis.
