ALS is pleased to announce that sample preparation is now available at our lab in Auezov, Kazakhstan. The commercial sample preparation lab is located in the village of Auezov, East Kazakhstan, about 90km southwest of the city of Ust-Kamenogorsk. Kazakhstan is a large country where mining plays an important part of the economy. ALS Global is the first internationally known lab to begin operations in this vast and mineral rich country.

Although Kazakhstan is better known for its oil and gas, its minerals sector is very important. Kazakhstan is currently the world’s number one producer of uranium and also produces gold, copper, aluminum, chrome, iron, lead, manganese and zinc. ALS is known as ALS Kazlab in Kazakhstan.
